Thrane & Thrane	Greater than Capsat 2.20	Inmarsat C

* Important Notice
Commissioning and tracking are at the customer's risk and we may withdraw services from underperforming equipment at any time. If you are registering an Inmarsat C terminal with 'Capsat' software, then the version must be greater than 2.20. Capsat 2.20 and lower will not work with Pole Star services. However, as the commissioning process is automatic, you will still be charged a registration and subscription fee.
